MANAGEMENT DISCUSSION & ANALYSIS

The purpose of this discussion is to provide an understanding of financial statements and a composite summary of performance of our business.

Management Discussion and Analysis (MDA) is structured as follows:

- Overview of Indian Economy
- Electronics Industry Overview
- Financial Performance and Highlights
- Internal Control Systems and adequacy
- Material Development in Human Resources

OVERVIEW OF INDIAN ECONOMY

The rate of growth in 2011-12 is estimated at 7.1%, which is marginally higher than the projection of 6.9% as per the Advance Estimates (AE). The council projects a slightly higher growth for agriculture and construction than the Advance Estimates.

Gross fixed capital formation (GFCF) as a proportion of GDP had reached a peak of 32.9 per cent in 2007/08, the year preceding the global crisis. It dropped to 32.3 per cent in 2008/09 and then to 31.6 per cent in 2009/10. Initial estimates are that in 2010/11 this ratio slipped further to 30.4 per cent. The AE for 2011/12 suggest that there may have been further slippage to 29.3 per cent. That is a decline of almost 4 percentage points over the last four years.

International conditions continued to worsen through 2011. The negative developments in the Eurozone outweighed the small improvements in evidence in the US economy. It is possible that the US economy will grow by more than the 1.8 per cent projected by the International Monetary Fund (IMF) in September 2011 and reiterated in January 2012.

Large scale liquidity injection by the European Central Bank (ECB) since December 2011 has lowered yields on the government bonds of those countries under the magnifying glass. Though there is yet no resolution in sight and affected countries have large volumes of debt due for roll over, there is some improvement in the situation, insofar as the potential for shocks are concerned. Germany seems to be willing to provide extended support, partly as a result of which the European Central Bank (ECB) has provided large amount of finance through their banking system (€489 billion), which may go up further (to €1 trillion). The Eurozone members appear to have signed up for a coordinated move towards a fiscal union – which is necessarily a precondition for a monetary union with a membership of heterogeneous economic strength to survive.

There have to be adjustments made to the selling prices of sensitive refined petroleum products to cover costs and reduce the huge burden of subsidy being borne by Government and the oil companies. As a result the suppressed inflation on account of incomplete cost pass through in these sensitive refined petroleum products has now to be phased out in 2012/13 and will then express itself on headline inflation. The recovery of the currency may obviate the kind of adjustments in goods that are either imported or priced on import parity that was being envisaged in the closing months of 2011. Inflationary pressure will continue to ease through 2012/13 and will remain around 5-6 per cent for the year. It will be necessary to keep a sharp vigil on food prices and take proactive measures not only to encourage output increase but equally, if not even more urgently, to ensure the rollout of an

adequate food logistics network that can do justice to the rising demand for and output of horticulture and animal husbandry products.

The fiscal balance of the Central government in 2011/12 is likely to expand beyond its budgeted estimate of 4.6 per cent of GDP. This development has been occasioned primarily by much higher than budgeted subsidies – especially that on refined petroleum products. A large subsidy bill directly reduces the resources that are available for development expenditure, while also by expanding the borrowing needs of Government squeezes investible resources to an extent that undercuts productive investment by the private sector. In 2012/13, Government must strive to contain and improve the efficacy of subsidies, vis-à-vis the development needs that need to be carved out of the Union Budget. Adequate safeguards needs to be taken to prevent any negative fallout of the government borrowing programme on the financing needs of the private sector. It must be incontestably demonstrated that government finances are indeed on the path of fiscal consolidation thus reinforcing the final pillar of macroeconomic stability
